

MR. JULIUS RIDGWAY: My name is Julius Ridgway. I live in Jackson. My family has owned interest in this area for many decades and have followed the activities and the research on this dome, and we have cooperated with the DOE in their efforts to try to acquire the site back in 1991 and '92. And I'd just like to indicate that we own 75 percent of the salt and storage rights under this site, and we want to indicate our cooperation and support of your project and indicate support and willingness to work with the service owner in this project. Thank you.
